

Preference

goes to military/National Guard with automation experience.

Eagle Group International, Inc. is a recognized leader in providing service and support to large federal and commercial organizations. We are currently seeking applicants for MEDPROS - Data Analyst.

Locations:

Camp Shelby, MS

Job Description:

Provides analytical and training support at the installation level for Medical Protection System (MEDPROS) and Medical Operational Data System (MODS). MEDPROS is a system component of the Office of the Surgeon General's Medical Occupational Data System. MEDPROS tracks health status of individual soldiers with an ability to roll up to larger military units (battalions, brigades divisions, etc.). Understands, conducts queries, manipulate data fields, and develops reports of the system through use of Unit Identification Codes or personal information on soldiers. Ensure the quality of data entered into the module. Trains authorized personnel on the use of the MEDPROS and MODS program.

Qualifications:

These individuals must be willing to travel as needed and possess automation skills, tenacity, and a genuine desire to serve soldiers and the US Army Reserve and National Guard.

Requires Secret Clearance.

Experience:

Medical and IT experience preferred.
